the Rev. Karl Reiland of St George's Church, foreseeing this struggle in the House of Bishops, had thrown down the gage of battle as the representative of the extreme Low Church party by inserting in the parish's year book an invitation to the other side to withdraw from the church. Was accepted on all sides yeaterday. St. George's is the largest parish in the city; is the church home of Seth Low, R. Fulton Cutting, J. P. Morgan and other distinguished laymen, and its rector represents the evangelical element of the church. Between the High and Low Church elements, as judged by their spokesmen, it seems to be a case of each inviting the other to step out, each side declaring that it is conforming to the prayer book. One thing seems to be certain, however, and that is that the High wever, and that is that the High urch priests will not accept the in-ation of such men as Dr. Reiland to church as its canons stand at

"The two parties in the church," said Dr. Grosvenor, "have always existed adjusted. I am quite sure that the High Church element will not withdraw. There is room for both and I believe that they will continue to maintain the same relation."

Commissioner Woods startened under the question. The firm grip he had of his chair seemed to be holding him back from springing at the Senator. It was evident that he was restraining himself only by a great effort.

"I resent that question and its insinuation," he fairly shouted. "You've will continue to maintain the same relation. tive positions as in the past.'

"Just as Impertinence."

"I am not particularly interested in Dr. Reiland's invitation to the High Church men to move," said the Rev. Dr. J. G. H. Barry, rector of the Church J. G. H. Barry, rector of the Church of St. Mary the Virgin, the leading ritualistic parish of this city. "That I merely regard as a piece of impertinence. Neither am I interested in the Protestant atmosphere which Dr. Reiland says 'our Catholic friends cannot stand.' What I am particularly interested in is the catholic atmosphere of the Book of Common Prayer, which Dr. Reiland does not seem able to stand."

Dr. Barry called attention to the fact that Protestant ministers had to be reordained before being admitted to the ministry of the Episcopal Church, whereas the church accepted the ordination of Catholic and Greek priests. That, he said, indicated the official attitude of the church. He said that it was wrong to assume even if a split did of St. Mary the Virgin, the leading ritualistic parish of this city. expressed it as being difficult to say whether there was room for both in the same church. "The question before us now," he said.

"is, Is it God's will that the church should represent all kinds of opinion, or does He want it to be a rallying ground of all kinds of opinion? If it can be the latter I see some future for it. I am merely waiting to see. Dr. Reiland would deny even the priesthood. He would denature the word. He would call the holy communion merely a memorial and would deny everything that makes it worth while. There are plenty

makes it worth while. There are plenty of Protestant sects where people who practise these things could be better off, sects much better managed than our own. The great difficulty with the Protestant side in our church is that they are not even Protestant; they won't even use old Protestant methods."

It was admitted by some members of the Low Church party that the present situation, involving more bitterness than has existed in many years, would probably be sharply defined at the coming meeting of the House of Bishops, and that all eyes were now turned that way in the hope that some light might be thrown upon the future policy of the Church. Should the Bishops vote to censure the action of the missionary board this action would be taken by many as throwing the weight of Episcopal authority on the High Church side and a direct rebuke to the attempt of the Low Church men, such as Dr. Reiland, to put a stop to ritualism.
